

Installing the Global Resort Systems Demo

Confused? No problem. We can talk you through the installation, or install via remote control (we do all the work), just call us to schedule a time!

If you encounter any problems or errors during the installation process, or have any questions at all, please feel free to contact our office at 828.273.9678.

To find out more about using the demo system, download our [Using the System PDF](#) from our web site, or [click here](#).

To find out more information on the system, download our [Information PDF](#) from our web site, or [click here](#).

Follow these easy steps to install the demo system. In most all cases, you will be clicking on Yes, Next, Continue, Finish, or Install. You really do not have to read this PDF unless you are not familiar with installing software on your computer.

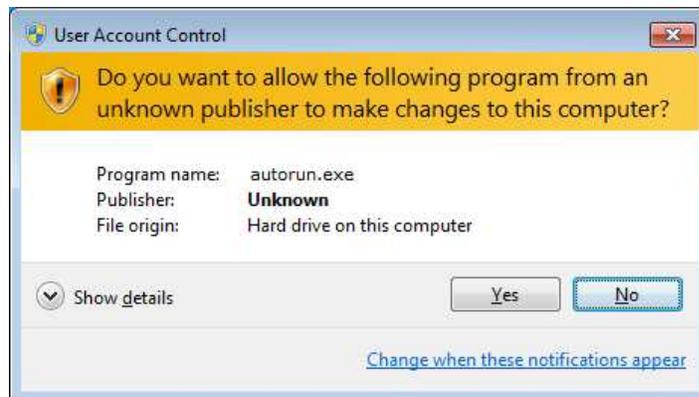

After you have completed our contact information screen, your browser should display a screen similar to this. If you do not see the options at the bottom of the screen click on the link to start the demo download.

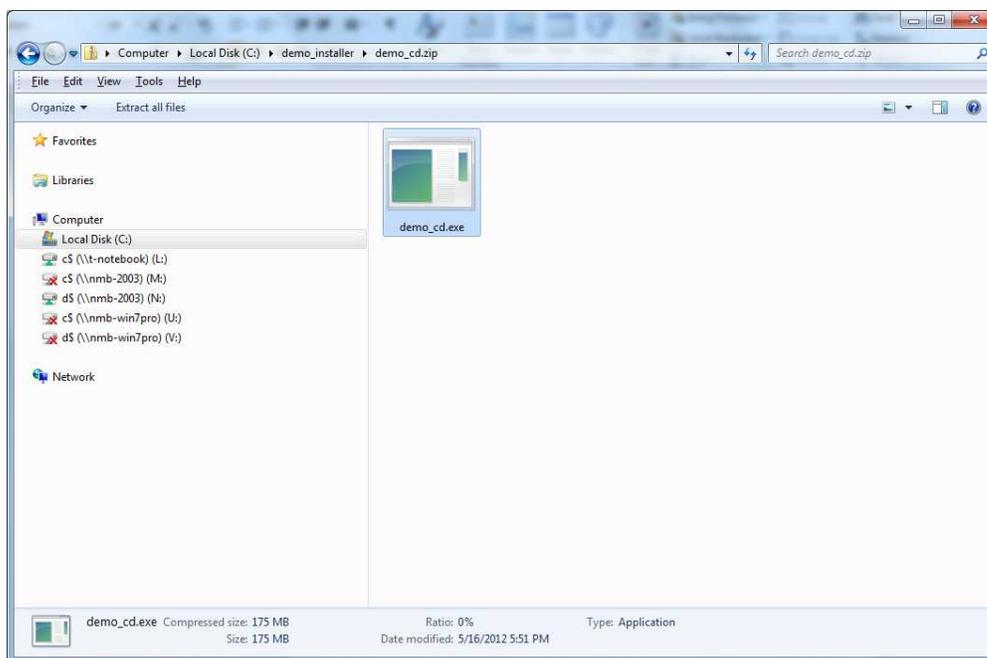

Just click on **Open** to start the download process.

User Access Control

A note to Windows Vista and Windows 7 users. Microsoft has added an extra level of security, or annoyance, depending on your view, called User Access Control. This is turned on when shipped, so if you have not turned your User Access Control off (this can be done through your Control Panel), you will see the following screen once or several times depending on your settings. Please click on **Yes** whenever this screen appears.

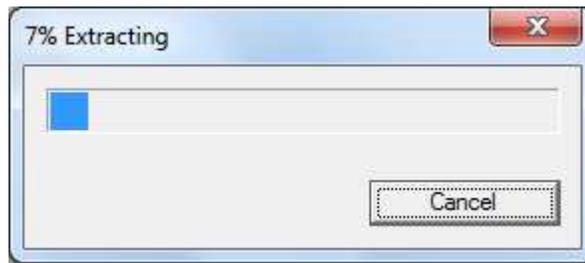

Ok, after the compressed zip file is downloaded to your computer, you should see something similar to this.

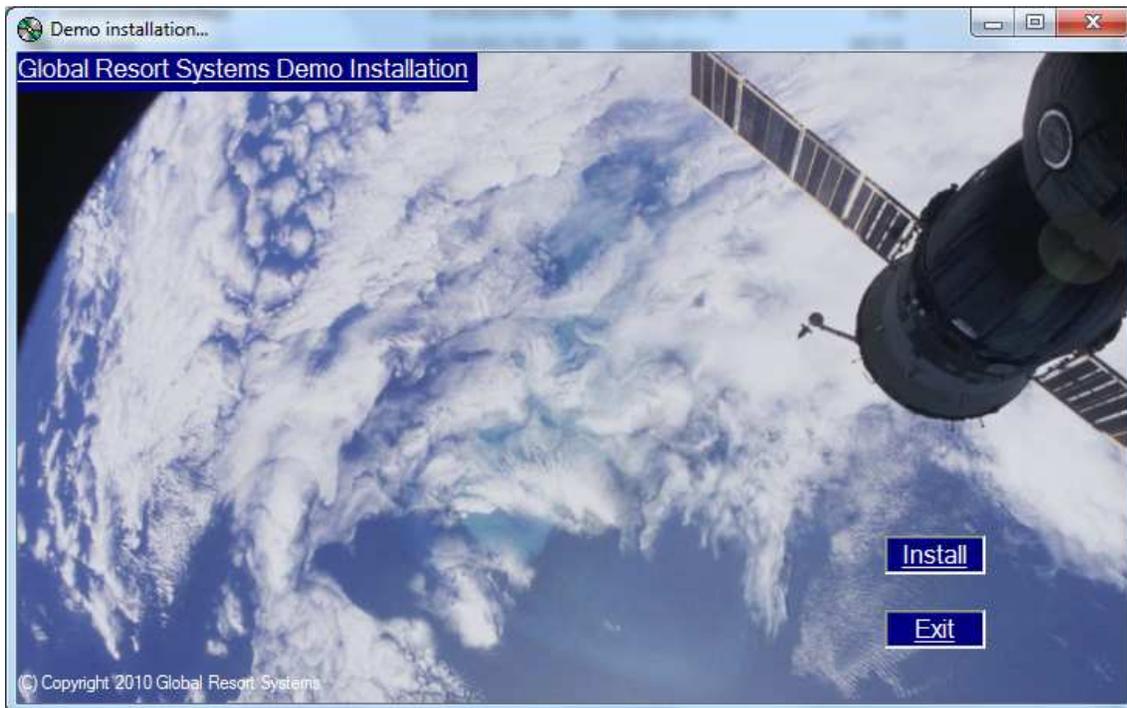

Double click on the **demo_cd.exe** icon on your screen. You should see a screen similar to this. (Some users may only see **demo_cd**. Go ahead and click it.

Click on **Run** and the extraction process should begin. This unzips the file and starts the demo installation program.

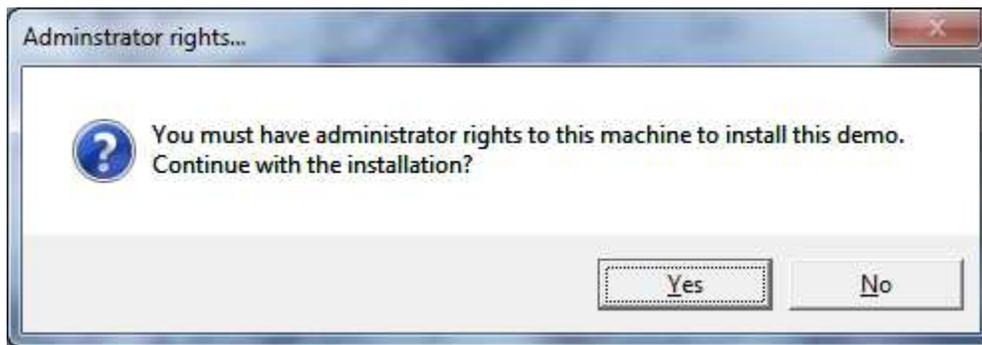

After the zip file has finished extracting, you should see this screen.

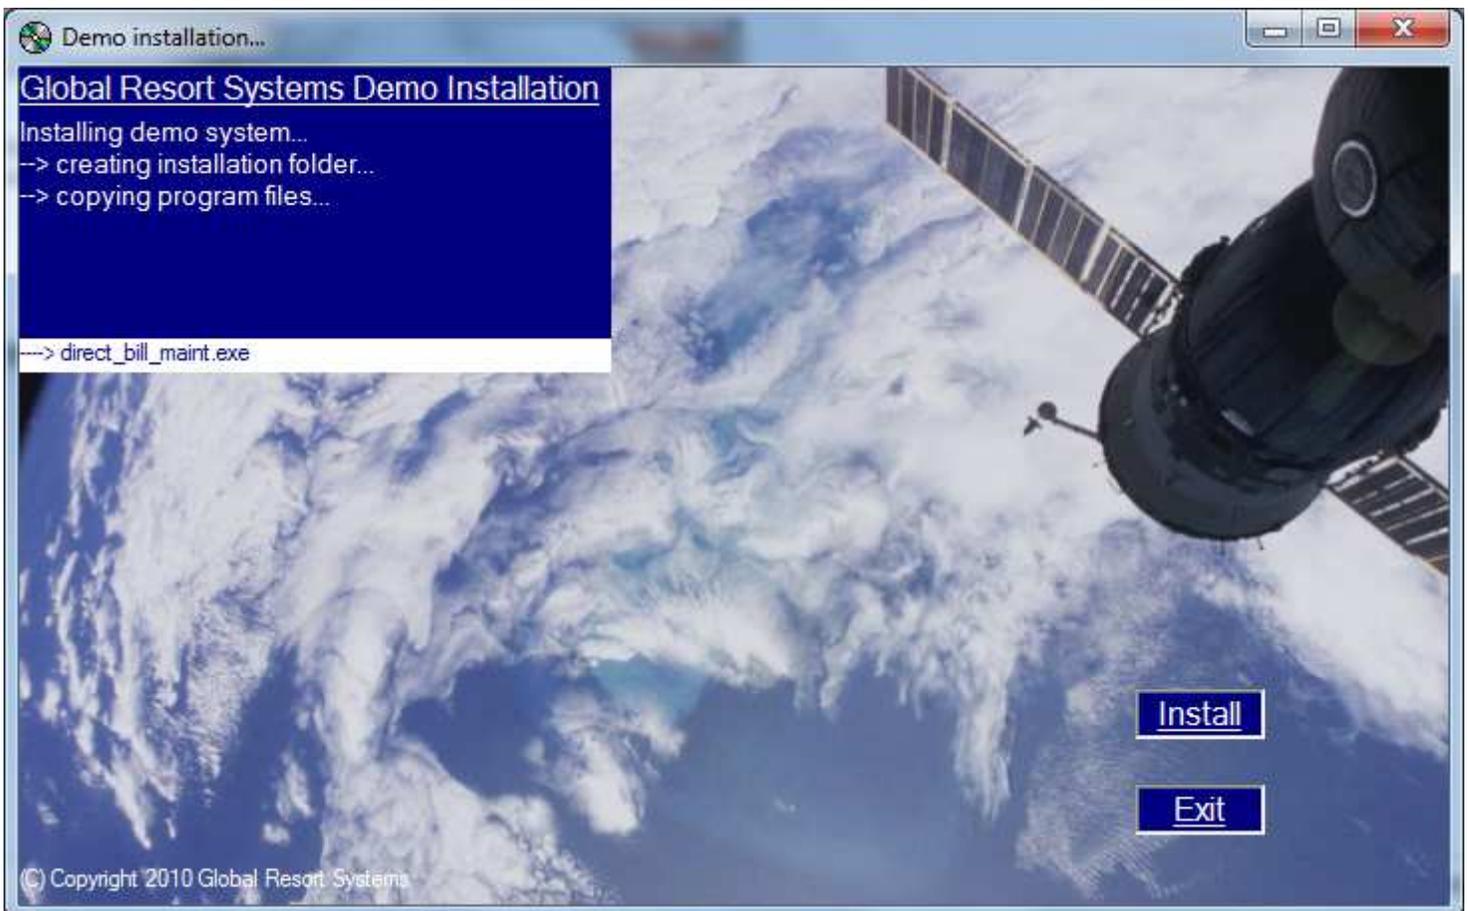

Click **Install** to start copying files.

Just a reminder, you must have administrator rights to your computer to install the demo. If your not sure, click on **Yes** and the demo will attempt to install. If it is not successful, then most likely you do not have the administrator rights. Some users in a corporate environment might have this trouble. Contact your IT staff for help.

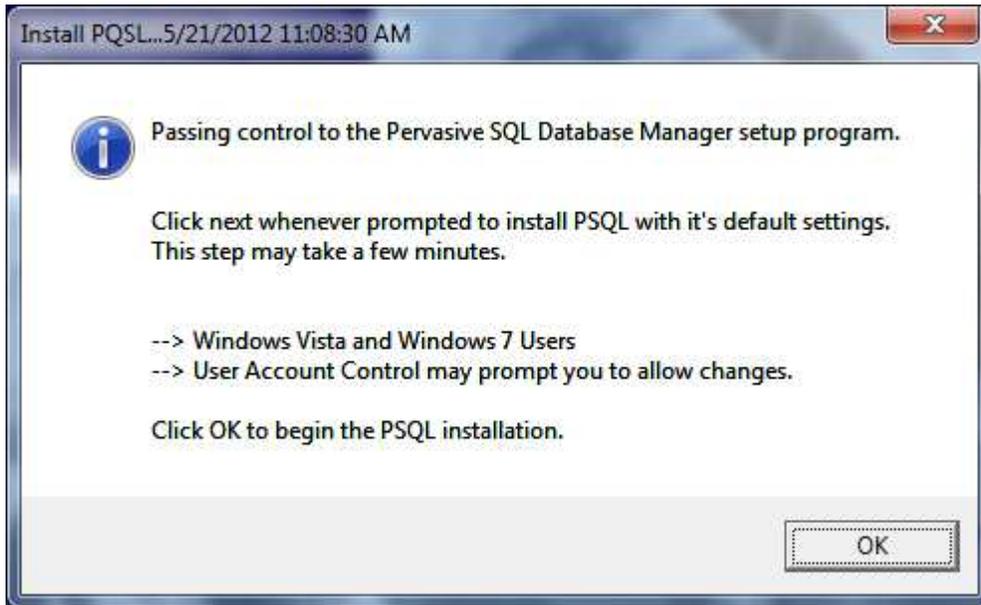

Click **Yes** to continue. You will see a screen similar to this while the demo is being installed.

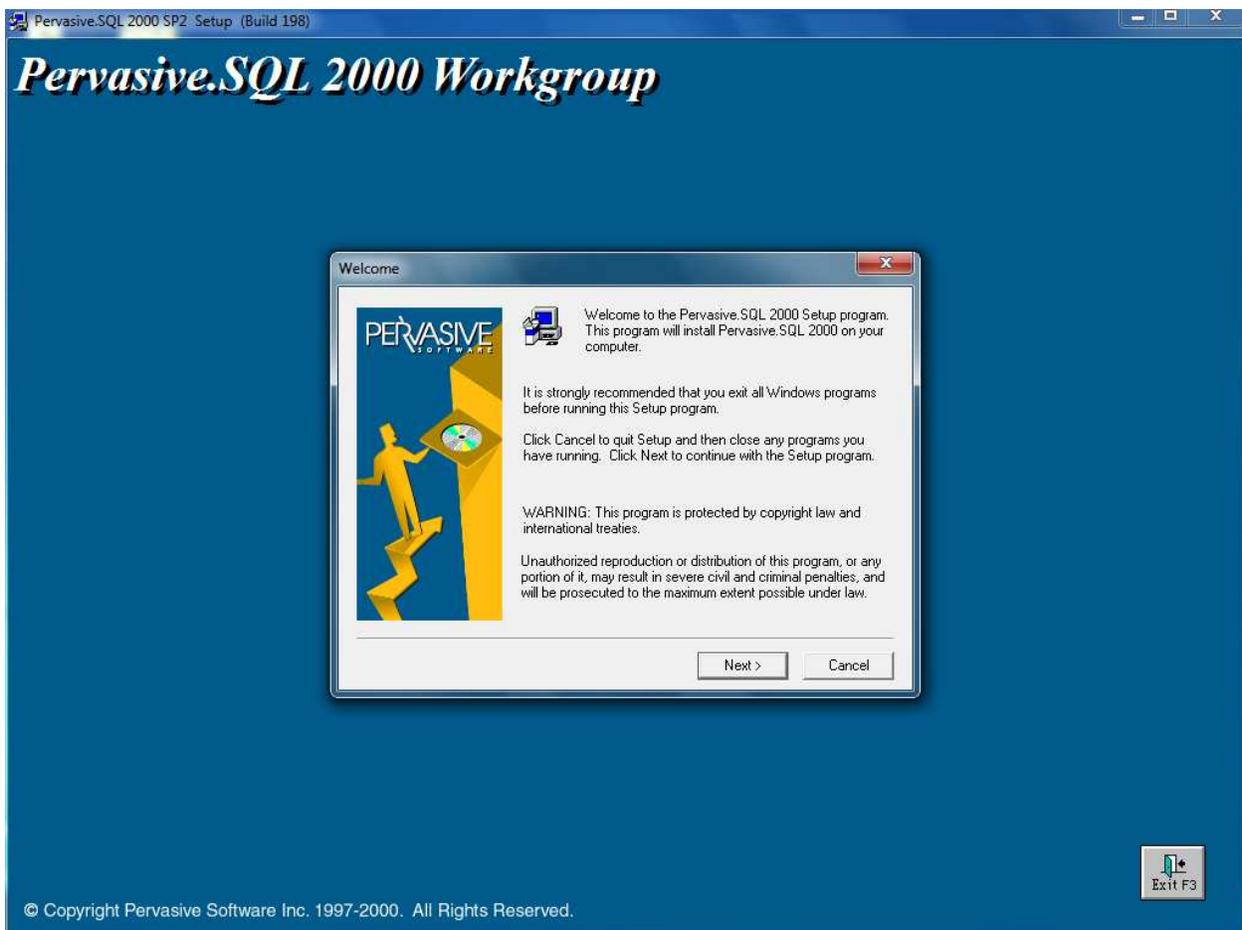

Last step now. If your computer does not have the Pervasive SQL database manager installed, we must go ahead and install the Pervasive SQL database manager. Pervasive SQL is rated the quickest in the industry. Follow the next pages to install the Pervasive SQL database manager.

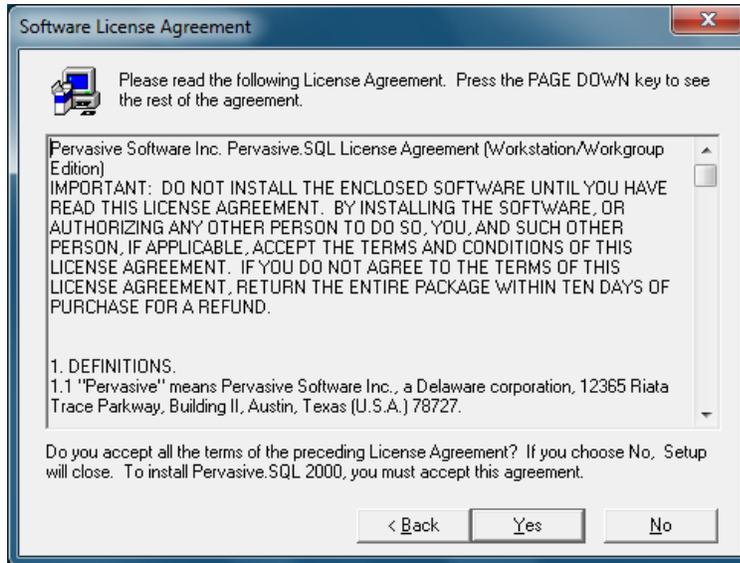

Click **OK** to start the Pervasive Database Manager install. We use Pervasive SQL 2000 Workstation for demo purposes only. Any new installations will be performed using the latest version of the database. We have found that PSQL 2000 installs and performs well on any platform.

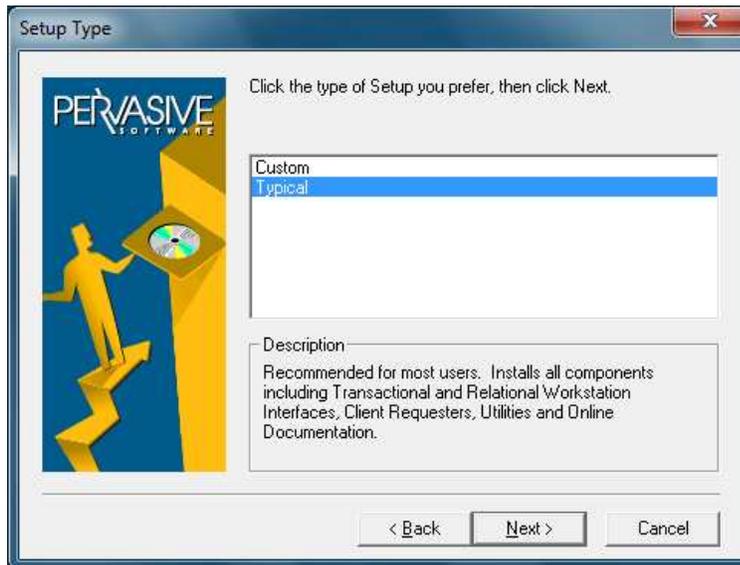

Click **Next** to continue the install.

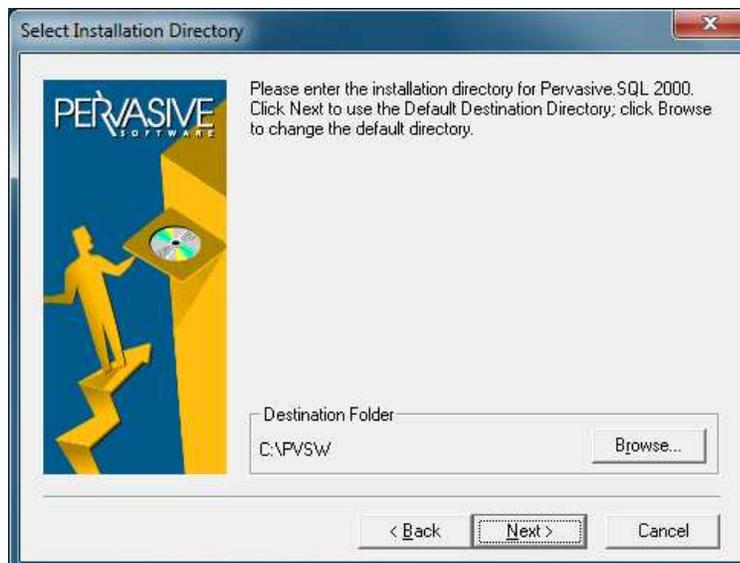

Click **Yes** to continue the install.

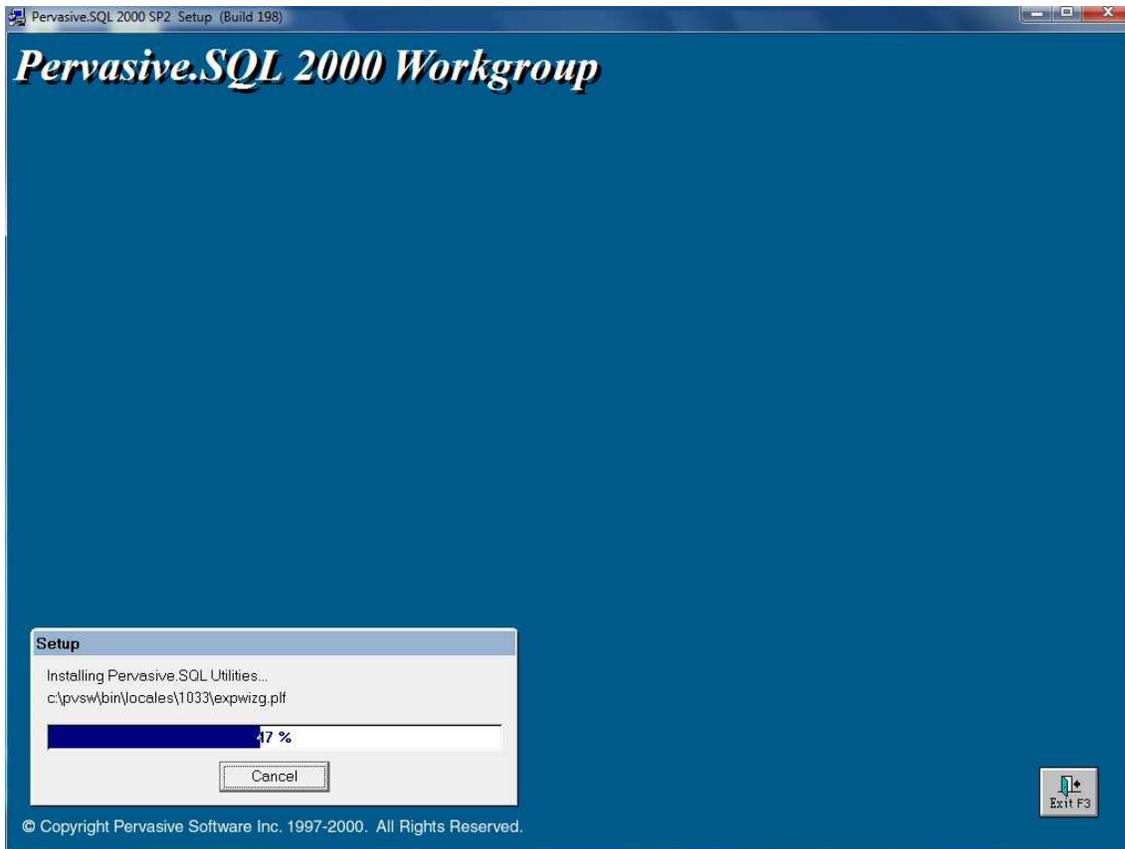

Click **Next** to continue with the Typical setup.

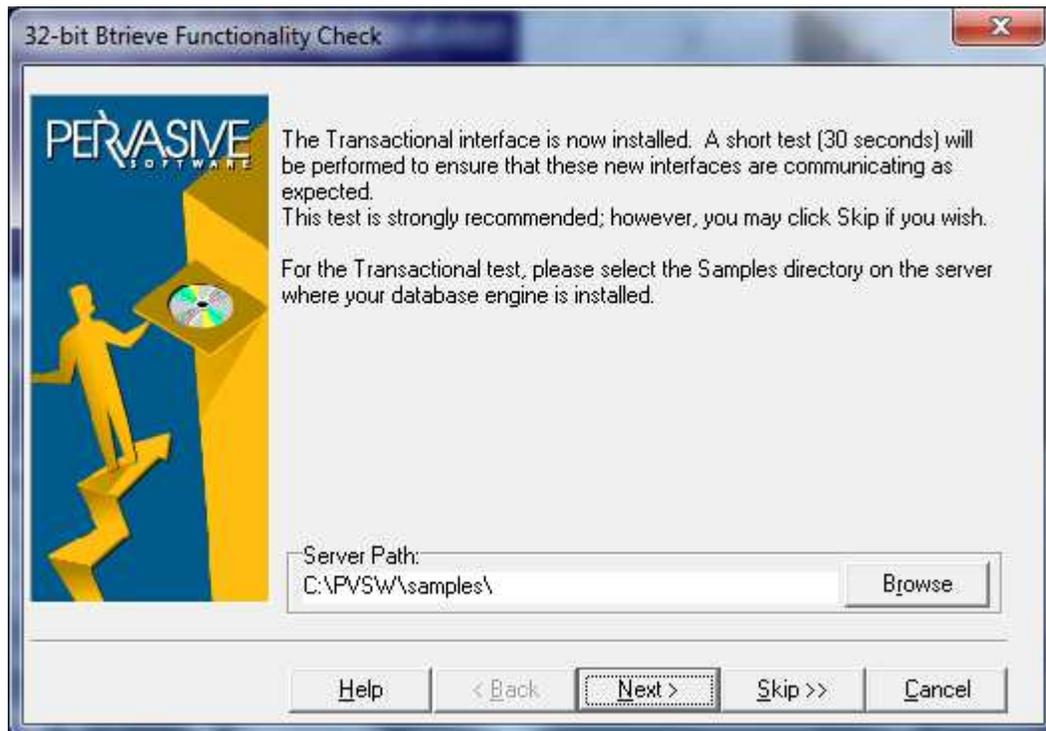

Click **Next** to continue the install.

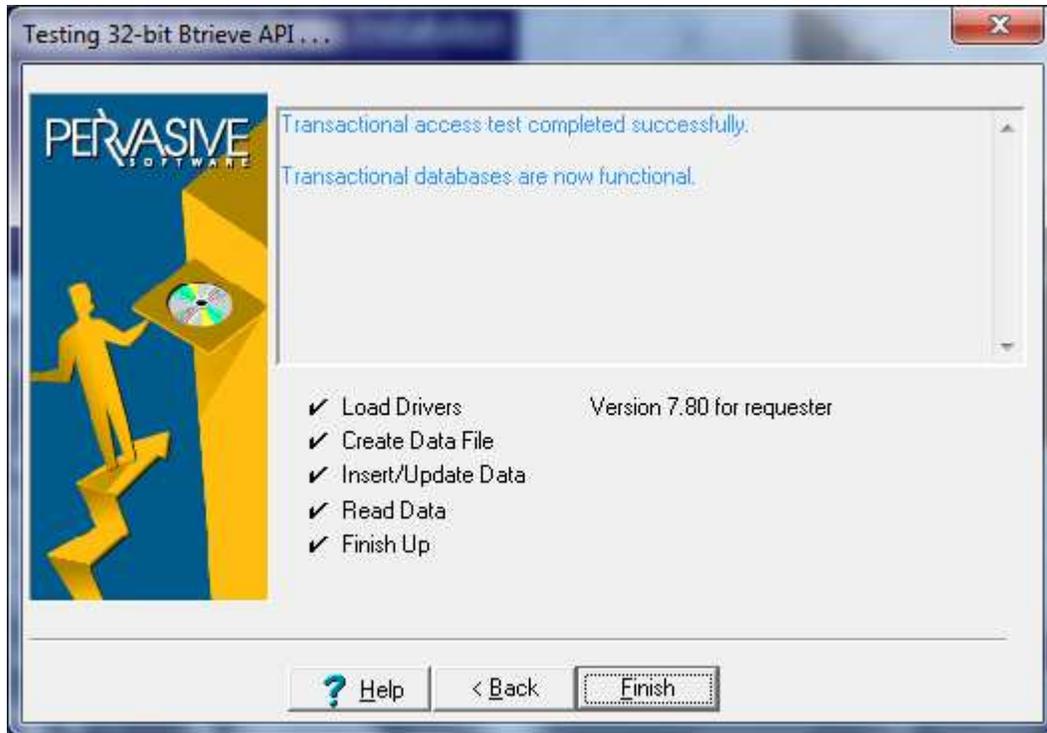

The Pervasive SQL 2000 Workgroup will begin installation. Just hang on while it copies files.

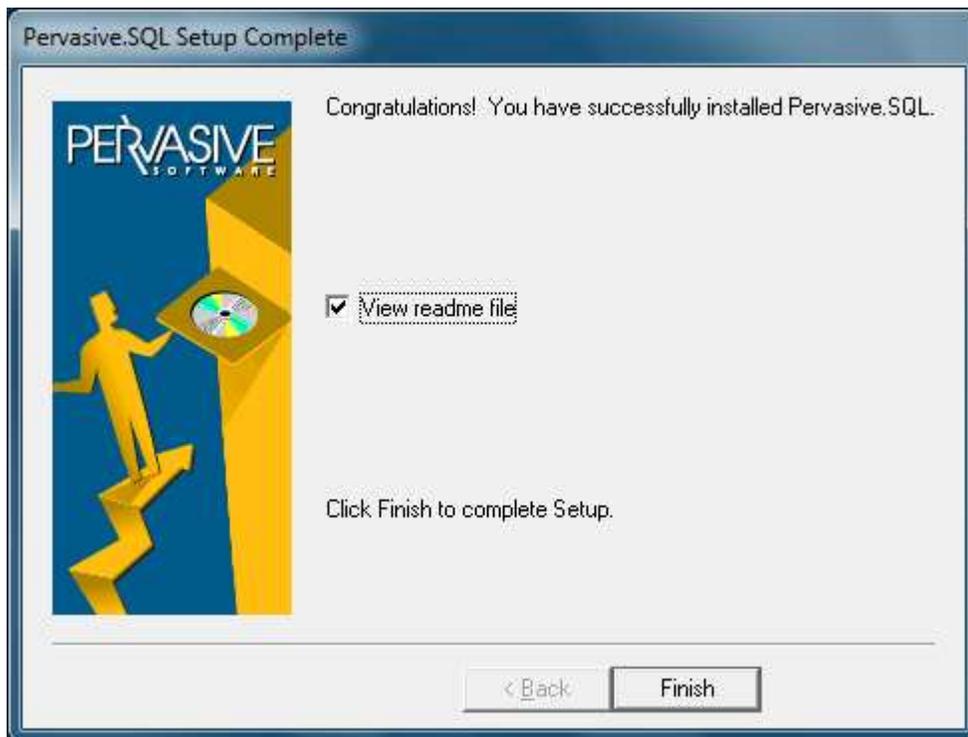

Click **Next** to continue the install and the install will make sure everything is working properly.

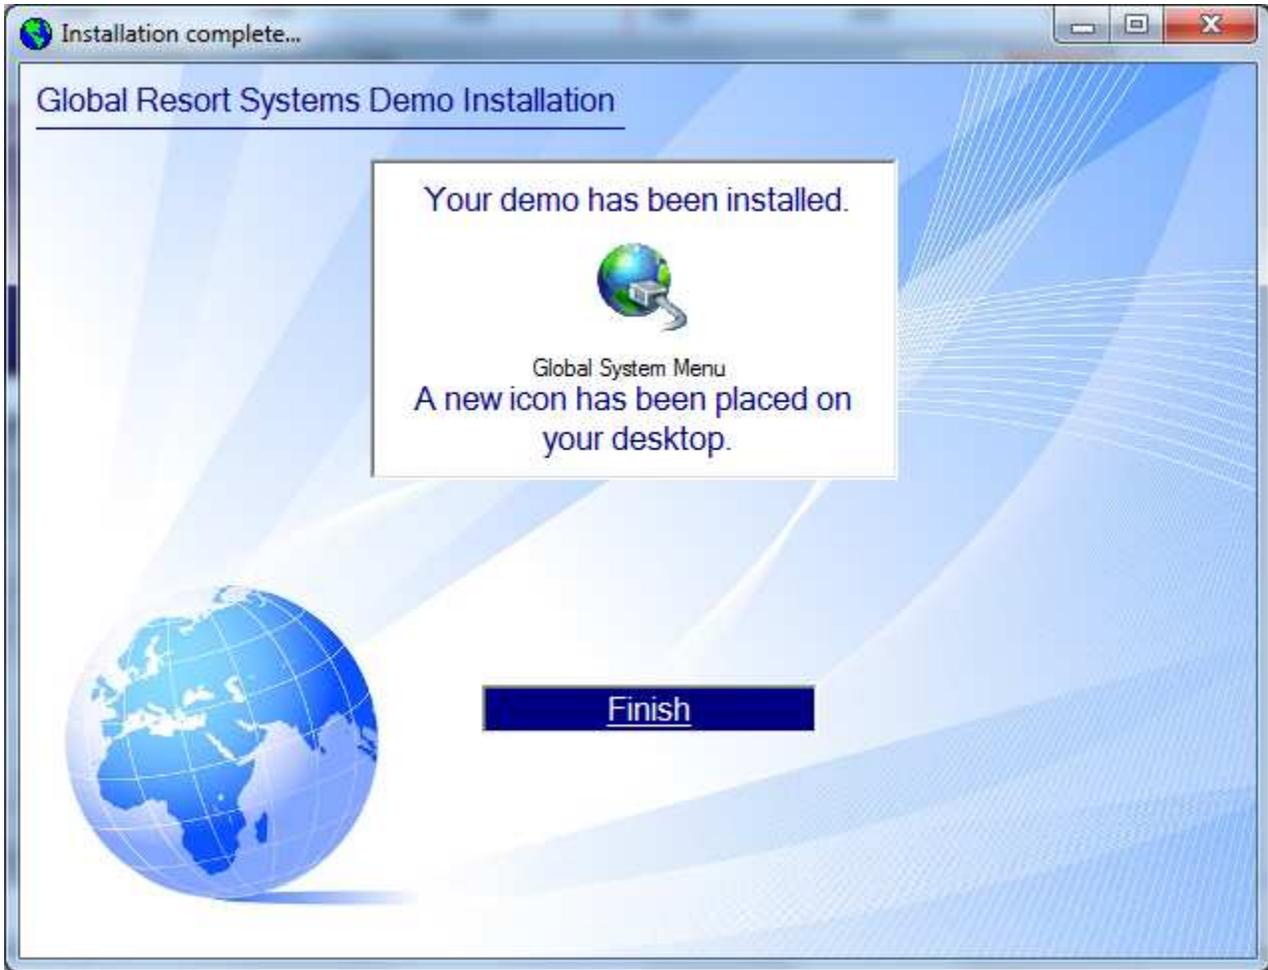

Ok, click on **Finish**.

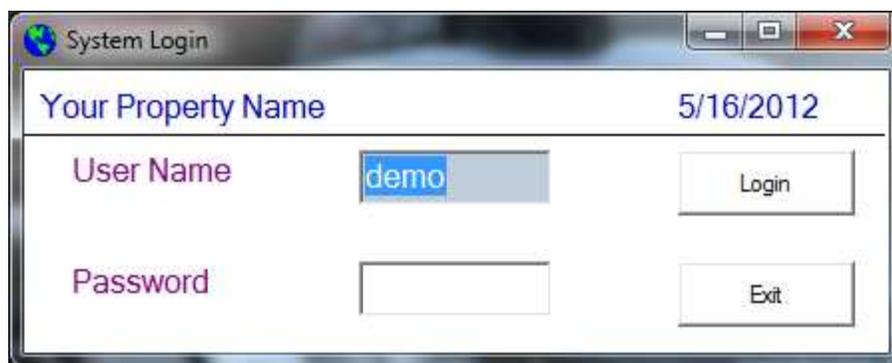

You can **uncheck** the View readme file. Then click **Finish**. If you forget to uncheck the readme file, then close the web browser when it opens the readme file.

When the Pervasive SQL installation is finished you should see this.

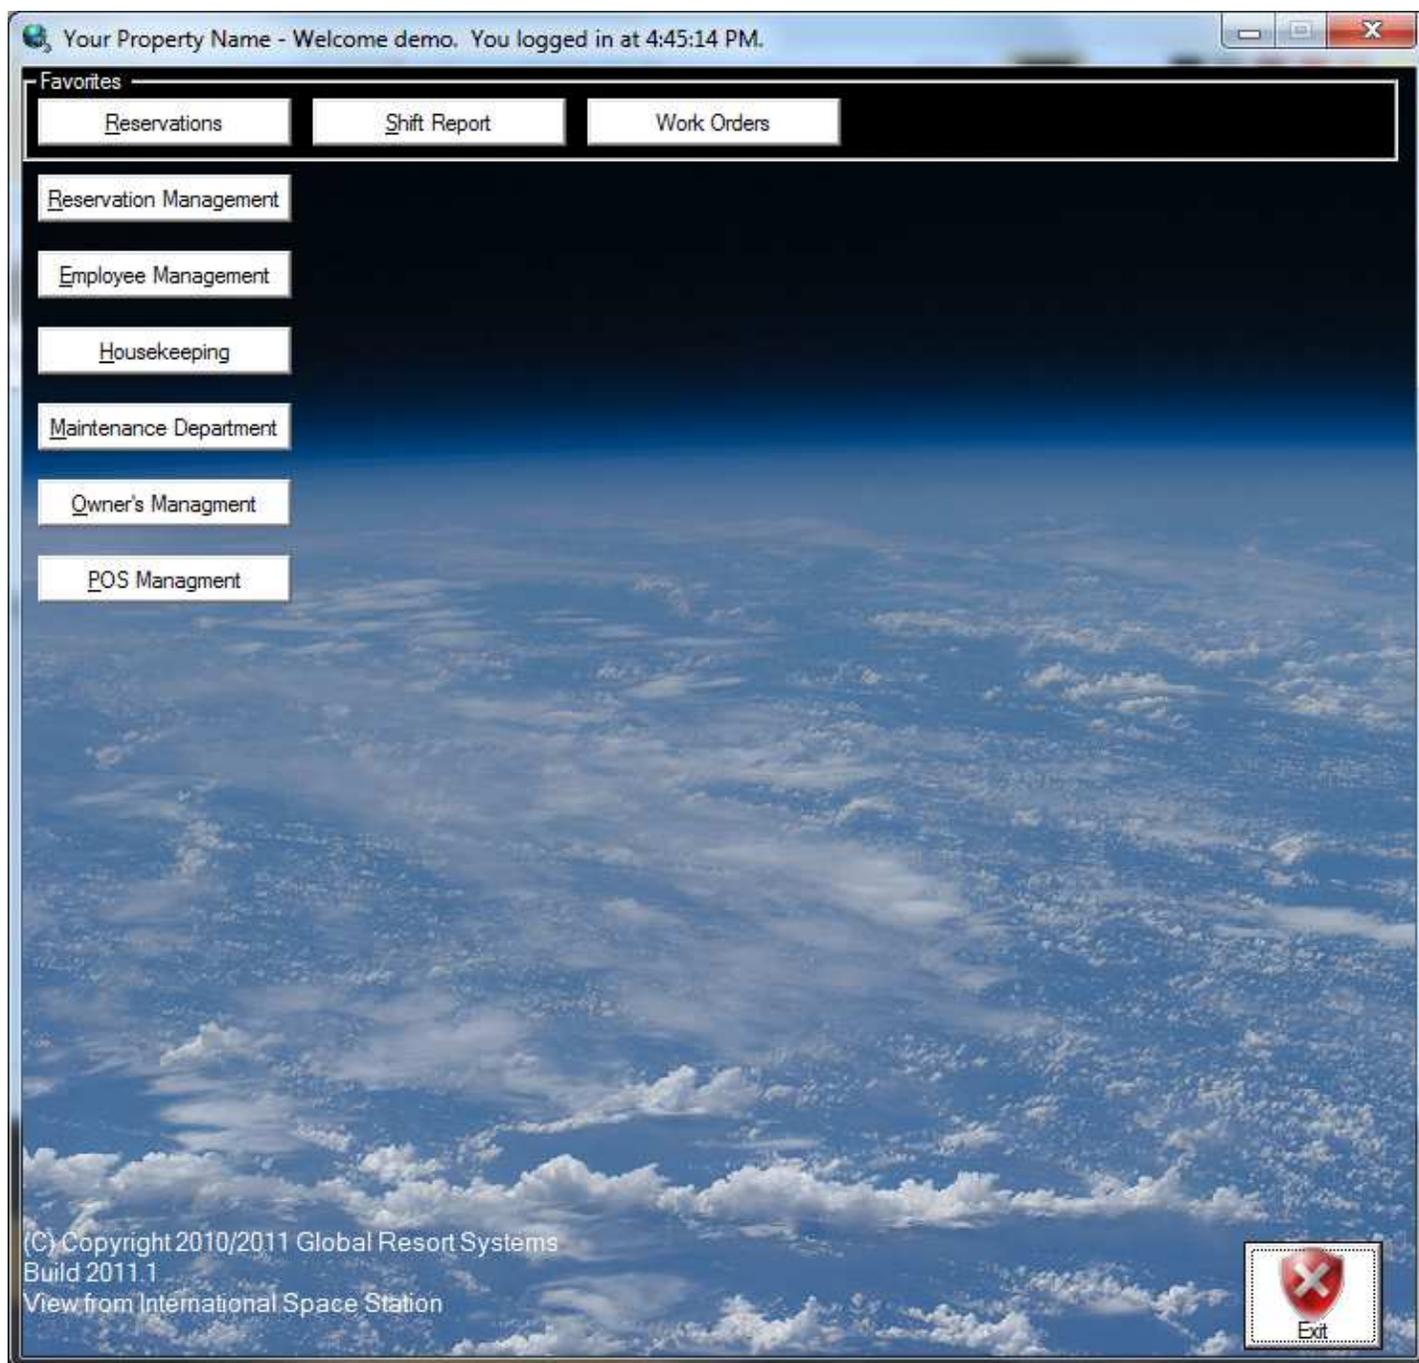

Click **Finished** to close this window. An icon name Global System Menu should now be on your desktop. Double clicking this

Leave the User Name as demo with no password and click on **Login**.

Alright, the main system menu should be displayed. Each main system is listed on the left, with quick start Favorites buttons on top. Click on **Reservations** to get started.

Ok, you are ready to go. If you have encountered any problems or errors during the installation process, please contact our office at 828.273.9678. Of course if you rather us talk you through the installation, or install via remote control (we do all the work), just call us!
